*Software upgrades to by procured by the Contractor.

ECN = Equipment Control Number   HM = Hardware Maintenance   SSA = System and IT Security Administration
SSM = System Software Management   AM = Applications Management   DBA = Database Administration
For column 4: Does not have to be checked if System and IT Security Administration is requested for the system as a whole.
   Enter the security code to request for individual processors - but only if system and IT security administration for the system as a whole will <u>not</u> be provided by ConITS and the processor is administratively isolated from the rest of the system.
   Enter "O" if another contractor (e.g. ODIN) will administer the individual processor. This precludes selecting HM and SSM.
For column 8: Enter 1 for COTS; 2 for non-COTS, not developed locally; 3 for software developed by or for LaRC.
